# Harvard Referencing

## A quick guide to referencing:

- **Books and E-books**
- **Journal articles**
- **Newspaper articles**
- **Web pages**
- **TV programmes**
- **Youtube**

This quick guide uses the **Harvard** system of referencing (Author, Date), and shows some of the common sources and how to reference them in your reference list or bibliography.

A **reference list** sits at the end of your assignment and will list the full details of all the sources you have cited within your text. References are listed alphabetically by the author's surname.

A **bibliography** is presented in the same format as the reference list, but this time it lists all the sources you have cited within your text AND all the materials that you have consulted in the research and preparation of your assignment, but may not have cited directly within the text.

In addition to listing all sources in a reference list or bibliography, Harvard referencing requires you to place short in-text references within the text of your assignment, whenever you use or refer to the words and ideas of someone else (one of your sources).
